

Over 90MW
of solar
Operations &
Maintenance is
already trusted
to Lark Energy

Let a UK market leader take care of your solar system

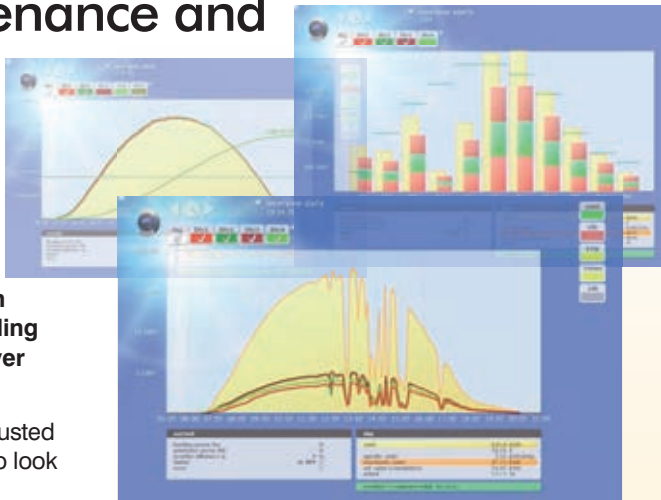

ACHIEVE
UP TO A
40%
BETTER
PERFORMANCE*

Protect your investment and maximise your returns through effective maintenance and monitoring of your system

Building on our extensive experience of operating and maintaining 90MWp of solar farm assets for investors, we can now offer the same industry-leading services to all PV owners whatever the size of system.

Lark Energy is fully bankable and trusted by leading investors in the market to look after their assets.

This 9MW solar farm at Hanson's Ketton Cement Works in Rutland is an example of one of the larger-scale systems operated and maintained for its owners by Lark Energy.

Lark Energy has developed cutting edge monitoring and control systems to assist in monitoring performance and maintaining systems efficiently.

To date, Lark Energy has implemented detailed operation procedures and provided maintenance services on more than 50 sites throughout the UK. This proactive service ensures that systems perform at their optimum throughout the year and maximise financial returns.

Lark Energy provides two levels of O&M depending on your budget and the size of your installation, with prices starting from as little as £10 per kWp per annum (subject to site survey).
